

CYBER SECURITY ASIA 2023

Managing Cyber Risk in a Threat-Based World

19 – 20 June 2023 | Sheraton Imperial Hotel Kuala Lumpur

Cyber-attacks are an ever-growing threat in today's tech environment. Cyber Security Asia 2023 is the platform for Cyber Security professionals in all industries to share knowledge with peers for jointly coping with the cybersecurity challenges. Businesses and institutions of all sectors will learn how to enhance cyber resilience and protect their core.

With the support of forward-thinking security strategies and technology solutions to match, the modern business can minimize potential risk and step into a digital future confidently.

OVERVIEW >

Cybersecurity failure is one of the top biggest threats to the greater society, according to findings from the World Economic Forum 2021 Global Risks Report. It can no longer be an afterthought. It must be a forethought, a front-end proposition as part of digital strategies, research and development and business outcomes. It is increasingly becoming a boardroom conversation. It's all about managing risk, ensuring resilience, and adopting a posture that's agile and nimble so that organizations can focus on outcomes and still be prepared for what's next.

No matter where you are on your security journey, proactively managing cyber risk through clarity, foresight, agility and resilience are the keys to securing and accelerating business progress.

Attending this conference will enable you to hear from industry experts on strategies, action plans and best practices to help you better understand and manage current threats, as well as identify and prepare for emerging challenges.

Register before 3 March 2023 & receive a Complimentary Best Selling book titled **Human Hacking** authored by Christopher Hadnagy

DID YOU KNOW?

Global cybercrime costs predicted to grow by **15% PER YEAR** over the next three years, reaching **\$10.5 TRILLION** annually by 2025

RANSOMWARE is the second leading cause of data breaches in Q1 2022, after phishing

Cyber insurance market will grow from approximately \$8.5 billion in 2021 to **\$14.8 BILLION** \$14.8 billion in 2025, and exceed \$34 billion by 2031

There will be **3.5 MILLION** unfilled cybersecurity jobs globally in 2023

35% of respondents experienced C-level resignations following a ransomware attack.

By 2025, cryptocurrency crime is predicted to surpass **\$30 BILLION**, up from \$17.5 billion

Women will represent **30%** of the global cybersecurity workforce by 2025, reaching **35%** by 2031

WHY ATTEND

Everything You Need To Learn and Everyone You Need to Meet in The Cyber Security Sphere

Discover the Security Use Cases, Business Models and Roadblocks that Can Support Your Digital Transformation

Learn From International Thought-Provoking Cyber Security and Cyber Risk Experts

Connect with Global technologist and Early Adopters to Expand your Network

WHO SHOULD ATTEND >

- Chief Executive Officers
- Chief Operating Officers
- Chief Information Security Officers
- Chief Information Officers
- Chief Risk Officers
- Chief Technology Officers
- Cyber Security Professionals
- Heads of Digital Transformation
- Heads of Insights and Analytics
- Operation Risk Heads and Managers
- Technology Risk Heads and Managers
- Cyber Security Experts
- Operational Technology (OT) Cybersecurity
- Global Operational Technology (OT) Cybersecurity
