Certified NETWORK PENETRATION TESTER 2024

Mastering the Art of Hacking Corporate Networks

9 - 11 October 2024 | THE STRIPES KUALA LUMPUR

Corporate networks are a critical infrastructure for organisations, and managing its security becomes increasingly challenging. By identifying and fixing vulnerabilities before they can be exploited, you can reduce the risk of a data breach and protect your business from financial damages.

The Certified Network Penetration Tester (CNPT) certification program is meticulously designed to equip professionals with the expertise needed to navigate these challenges. This training delves deep into various types of vulnerabilities prevalent in modern internal and external corporate networks and the sophisticated techniques used to identify and exploit them.

Abhinav Mishra is an Application Security Researcher with over 12+ years of experience in the field of penetration testing of web, mobile and infrastructure. He is the founder of Enciphers, where he takes care of heading the penetration testing, training and other offensive security projects. He is an author, speaker, and trainer with a successful track record across diverse regions. Abhinav has been training security professionals on web, mobile and infrastructure hacking around the world.

Why You Should Attend #CNPT Workshop:

- **Become The Master:** Lean the skills to identify and exploit complex vulnerabilities in corporate networks.

- **Real-World Application:** Gain hands-on experience with real-world scenarios.

- **Certified Expertise:** Earn a prestigious certification that validates your expertise and positions you as a top-tier professional in infrastructure security.

Certification For Future-Ready Security Teams:

The CNPT program offers a real-time, immersive training experience that combines insightful lectures, real-world case studies, and engaging hands-on exercises. Participants will gain a robust skill set essential for uncovering and mitigating vulnerabilities in contemporary corporate networks.

Demystifying Security

What's so unique about our training? With over a decade of experience in cybersecurity, we are passionate about sharing our expertise. We teach what we learn while securing organizations around the world. We believe the best way to teach hacking is by demonstrating exploits and vulnerabilities through real-life case studies and practical emulation.

What's so unique about our training?

At Enciphers, our training and certification programs stand out due to their real-world scenario-based approach and hands-on methodology. Our state-of-the-art training labs simulate real-life environments, providing a practical learning experience. Our unique platform, VantagePoint, puts a strong emphasis on hands-on challenges, allowing delegates to compete for leaderboard positions while solving complex problems. Each submission is manually reviewed, ensuring a thorough understanding of the material. Additionally, all our certifications are exam-based and verifiable online, adding credibility and value to your achievements. This blend of practical application, competitive learning, and verified certification makes our training programs truly exceptional.

Certified Network Penetration Tester

Hands On Training | Exam Based Certification

Master Real-World Scenarios

The CNPT certification is not just another theoretical course.** This training is firmly rooted in practical, real-world scenarios, ensuring you gain hands-on experience with the types of challenges you'll encounter in the field. You'll be immersed in simulated environments where you can test your skills, identify vulnerabilities, and develop effective strategies for securing networks and infrastructure. This approach ensures you are well-prepared to tackle real-world network security challenges with confidence.

VantagePoint Exam Platform

Certification is achieved through a rigorous exam on our dedicated platform, VantagePoint. The exam is structured around practical case scenarios, requiring you to apply your knowledge and skills in a realistic context.

Flexible, Yet Challenging

CNPT program allows you to tackle the certification exam at your own pace, providing the freedom to balance your studies with other commitments. However, while there is no overall time limit for completing the exam, each individual challenge must be finished within its specified time frame.

Unique Features Of Training

Extended Lab Access

Training participants will get access to the lab environment and VantagePoint for 30 days post-training, allowing them to continue practicing & refining their skills.

Dedicated Chat Platform

Attendees will have access to a dedicated chat platform (channel), to discuss, and ask queries, event after the training. This is optional for delegates to join.

VantagePoint Access

Attendees will be competing in a CTF like fashion, but instead of finding flags, they will be finding and exploiting real world vulnerabilities.

Training content

The content used in the training will also be provided to the participants, i.e. presentation, POC apps, notes, exploit codes, training live sheet etc.
