OPEN-SOURCE INTELLIGENCE 2025

Harnessing the Power of OSINT for Strategic Advantage

10-11 September 2025 | Parkroyal Collection Kuala Lumpur

In today's rapidly evolving digital landscape, leveraging publicly available information is not just an advantage - it is a necessity. Open-source intelligence plays a crucial role in modern investigations, enabling analysts to uncover hidden connections, gather valuable insights from publicly available sources and compile actionable intelligence to solve real-world problems. It empowers professionals across cybersecurity, law enforcement, and competitive intelligence to spot weaknesses, stay one-step ahead of threats, and deliver unprecedented precision.

Join us for an immersive experience where expert insights, practical tools, & interactive activities converge to demystify OSINT and arm you with the tools and knowledge to enhance your organization's cybersecurity, risk management, and decision-making capabilities.

This workshop will help your organization:

➢ **Enhance Competitive Intelligence**: Harness OSINT techniques to stay a step ahead of the competition.

➢ **Strengthen Risk Management:** Identify vulnerabilities from potential threats with comprehensive OSINT insights.

➢ **Rapid Incident Response:** Use OSINT to gather rapid, actionable information in times of crisis.

➢ **Improve Operational Efficiency:** Streamline data collection and analysis processes for operational efficiency

➢ **Bolster Decision-Making:** Utilize OSINT insights to make informed, data-driven decisions that support organizational goals and mitigate potential risks.

WHY OSINT IS A GAME-CHANGER?

❖ Reveal Hidden Connections & Digital Footprints for Investigations
❖ Identify How Public Information can be Exploited for Malicious Purposes
❖ Enable Early Threat Detection through Real-Time Monitoring

Trainers Biography

Ben Owen

INTELLIGENCE EXPERT, CYBER SPY & CO-FOUNDER – THE OSINT GROUP (UK)

Ben is an internationally recognised motivational and keynote speaker. He is worldwide recognise for his skills in cyber security, covert operations, and leadership. He has over 24 years of intelligence experience. He is the Co-Founder for The OSINT Group, who are an exclusive cyber risk mitigation company keeping their clients' digital footprints safe from hackers. They are also global leaders in online investigations training.

He has served in the military as a sniper, government level intelligence for a decade, and has vast experience in the private industry. He now works in cyber-security as a cyber intelligence advisor teaching law enforcement, military, intelligence operators and private entities across the globe. He is also a TV contributor starring in the Australian, British and American versions of Hunted, a high-tech, fast paced game of 'hide and seek'.

Danni Brooke

INTELLIGENCE EXPERT, CYBER SPY & CO-FOUNDER – THE OSINT GROUP (UK)

Danni is an Investigation and Intelligence expert. She has over 10 years' experience working as an undercover operative with the Metropolitan Police. For years, she worked on high-risk, high-profile investigations, helping to gather evidence on drug traffickers and other criminals. She is also Co- Founder for The OSINT Group, who are an exclusive cyber risk mitigation company keeping their clients' digital footprints safe from hackers. They are also global leaders in online investigations training.

She talks with authority and passion about security and investigations, and this knowledge could be essential for helping your team move forward and encouraging them to refresh their own knowledge. She is an award-winning author and has released two books "The Girl for the Job" and "Undercover Copper". She has appeared on a number of TV shows, including TV series 'Hunted'.

Testimonials

"Attending the OSINT training was a game-changer for me, providing the essential practical skills & tools to enhance my ability to gather & analyse open source intelligence effectively".

Marriott USA

"Sharpen my skills in online investigations, digital footprint analysis & using open-source tools to turn public data into actionable insights. Excited to apply these skills in real-world ORC investigations".

ULTA BEAUTY

"One of the best OSINT training I've attended. I particularly appreciated how the techniques were explained in relations to our specific areas".

AMAZON UK

"I learnt many new techniques through a series of live demonstrations & exercises and looking forward to using my newly learnt skills in future investigations".

PWC DUBAI

"Extremely Valuable course especially the tools which I am already using in my work".
