

STRATEGIC THINKING & CONFIDENT DECISION MAKING

Developing a Strategic Mindset to Deliver Real Business Outcomes

12 - 13 OCTOBER 2020
THE WESTIN KUALA LUMPUR

Strategic thinking and effective decisions are vital business skills that some people find difficult to use in their day-to-day work. Conversely, other people seem to favour “blue sky thinking” at the expense of practical implementation. The good news is that everyone can learn how to employ simple techniques to make better decisions with confidence. During this intensely practical course, participants will learn how to think creatively, generate solutions to problems, and put their strategic plans into practice.

This course enables delegates to execute a more effective strategic framework that will rejuvenate the business and employees towards achieving the goal of the organization. Emphasis is placed on the role of leaders, the importance of effective decision processes and necessity of effective strategic deployment and how they are able to buy their teams over. The interactive sessions enable leaders to develop a strategic mind-set and provide them with practical tools and mechanism to deliver real business outcomes.

After attending this workshop, delegates will emerge with the following objectives:

- Applying a five-point Strategic Thinking & Decision-Making
- Understanding & applying a Strategic Thinking model using a sample of the key tools and techniques used at each stage of the Strategic Thinking framework
- Managing complex relationships and diverse opinions to build a more productive team
- Uncovering uncharted risks faced by the company through intelligible questioning techniques
- Applying team and individual decision-making tools that help increase your probability of success
- Planning a Proven Process and executing the Roadmap

Apply Strategic Thinking practices into your business to accelerate your success by allowing a crystal clear focus to drive daily tasks for you & your team
